The Wings Program

Plan of Action 2007 – 08

This plan has been collaboratively developed by the campus planning committee, which represents all stakeholders. All performance goals identified in the No Child Left Behind legislation have been adopted by the district and are reflected in this Plan of Action.

The following funding sources support the objectives and strategies implemented to address identified student needs: Title IID, Title IV, Special Education, and State Compensatory Education.

Mission Statement

The mission of the Wings Program is to provide a safe, disciplined environment that encourages students to develop and succeed at their own pace. Wings provides an environment that will encourage and promote academic and behavioral potential, by developing positive attitudes, a sense of self-worth, and a vision of becoming successful and productive citizens in the community.

AEIS Reports

An in-depth review and desegregation of data by the campus site-based committee led to the development of the goal, objectives, and strategies included in this Plan of Action.

Findings:

- Though most students are achieving passing scores on TAKS, a few are not. These students are receiving a certificate of completion rather than a high school diploma.
- The attendance rate continues to be an item to target.
- The Wings Program is very effective in helping to keep the district drop-out rate low.
- Quicker identification of potential at risk students for Wings Admission.

Pregnancy Related Services Description

Chapel Hill ISD provides pregnancy related services (PRS), which are support services for pregnant students to help them adjust and stay in school during the pregnancy and postpartum period. Additional support services provided by the district include compensatory education home instruction (CEHI), counseling services, health services, and service coordination for government agencies and community service organizations.

A required support service for districts that offer a PRS program, CEHI provides academic services to the student at home or hospital bedside. During periods of confinement, students will receive eye-to-eye contact with a certified teacher from the district for a minimum of four hours a week. Students served four or more hours will earn five days present for ADA. A student receiving CEHI may also receive limited services at the alternative school campus to help with the transition from home back to school. The district has designated Bobby Brasher and Ada Schwane for compensatory education home instruction (CEHI).

Counseling services are provided two times a month or as needed for the pregnant students. Health services are provided by the school nurse.

The students are guided to appropriate outside agencies depending on individual needs.

Student Welfare, Wellness and Health Services

The principal or designee shall oversee the implementation of this policy (FFA Local) and shall develop administrative procedures for periodically measuring the implementation of the wellness policy.
